Jack Panel

1. Headphone Jack: Connecting headphones will automatically mute the built-in speaker output, so you can play without disturbing others.
2. Audio Output: This interface can be connected to audio equipment.
3. Operating Voltage: Input voltage range DC 9-12V.
4. Microphone: Use the manufacturer-specified professional microphone.
5. Audio Input: Plug an audio cable into the Audio Input jack to connect your mobile phone for song playback.
6. Sustain Pedal: This unit supports sustain pedal function. Press the pedal as required during use.
7. Triple Pedal: Supports triple-pedal functions identical to those of a grand piano, to meet your performance needs for various scenarios.
8. MIDI Interface: Connect to a computer, mobile phone or iPad via data cable.
Launch the corresponding software to transmit and receive MIDI signals.
9. USB Port: Play MP3 songs from a USB flash drive.

Bluetooth Function:

Under Bluetooth mode, connect Bluetooth-enabled devices to use the unit as a Bluetooth speaker. (Bluetooth Name: BT Audio)

Special reminder: This product is an electronic product. After electrified, the loudspeaker (two horns or one horn, earphone) has some current sound as a normal phenomenon. It is necessary to keep away from these devices, such as radio, routers, TV receivers, refrigerators, washing machines, etc.

Power Supply

This product can be supplied by standard indoor wall socket, please use only the power cord specified by this product. When you do not use, please be sure to turn off the power supply, if you do not use it for a long time, please pull out the power cord and keep it properly.

Sign

In order to ensure that you are safe and correct use of this product, to prevent damage to the user and other people, and to the financial damage, the specification and the product marked with a series of safety signs. All kinds of signs and their meaning.

Warning

This sign indicates that, if you ignore the flag and error operation of this product, there is a potential risk of death or serious injury to personnel.

Attention

This sign indicates that, if you ignore the flag and the wrong operation of this product, there is a potential risk of injury or other financial damage caused by personnel.

Logo example

- This triangle mark indicates that the user should pay attention to the matters. (left case is be careful electric shock)
- The circular sign painting a slash said prohibited matters. The icon in the logo or next to the specific content of the ban. (left case is no disassemble)
- Black dots indicate matters must be complied with. Icon in this sign indicates the specific content that must be followed. (left case is the power plug must be pulled out of the socket)

Warning

Smoke, odor, overheating

When the product is smoking, emitting odors or overheating, it continues to be used to cause fire and electric shock. In the event of such a situation, the following operations shall be carried out immediately.

- 1 Turn off the power supply.
- 2 Pull the plug from the power outlet.
- 3 Contact your agency

Power cord

● Improper use of power supply leads to danger of fire and electric shock. Must observe the following precautions.

- Special power lines specified for this product must be used.
- An AC power source with output voltage within the household rated voltage must be used.
- It is not allowed to overload the power socket and the power extension line.
- Improper handling of power lines, resulting in damage or rupture of the fire and the risk of electric shock. Must observe the following precautions.
- Do not place heavy objects on the power line or make them heated.
- Do not attempt to transform the power cord or bend it too much.
- Do not twist or pull the power cord.
- If the power cord or plug is damaged, replace the power cord of the same type.
- Do not use wet hands to touch the power cord and plug, otherwise there is a risk of electric shock.

● Please use the power cord in the place where the water will not be spilled. Water has the risk of fire and electric shock.

● Never put a vase or any other container with water in this product. Water has the risk of fire and electric shock.

● Do not let the minor contact plug and power line or a connecting plate. Minor knowledge of useless electricity safety causes danger of electric shock.

● Improper use of power supply leads to danger of fire and electric shock. The following matters of attention must be observed.

- Do not place the power cord near the furnace or other heat sources.
- Unplug the power cord from the power outlet. Must grasp the plug body.
- Plug the power cord into the power socket.
- Before connecting or cutting off the power cord, make sure that the power is off.
- The power cord should be removed from the electrical outlet of the wall before a thunderstorm occurs or traveling or before other long leave.
- At least once a year, unplug the power cord from the wall outlet and clean the dust around the plug.

Don't burn this product
Do not put this product into the fire, otherwise it will cause the burning of wood products and the explosion of the internal electronic components. There is a danger of fire and personnel injury

Water and foreign matter
Water and other liquids and (metal) into this product has the risk of causing fire and electric shock. The following operation should be performed immediately when the above situation occurs.

- 1 turn off the power supply
- 2 if the power cord is used for power supply, it will be pulled off from the wall of the power outlet
- 3 contact your dealer.

Dismantling and rebuilding
Do not disassemble this product or transform it in any way. Otherwise it will be hazardous to electrical shock, burns or other personal injury. All internal inspection, adjustment and maintenance operations should be entrusted to your dealer.
